

Mr. Director
SANTIAGO APARICIO V.
saparicio@dnp.gov.co
Environment and Sustainable Development Directorate
National Planning Department (DNP)
National Authority Designated to the Green Climate Fund
Calle 26 No. 13-19 piso 8- Bogota

Dear Mr. Aparicio

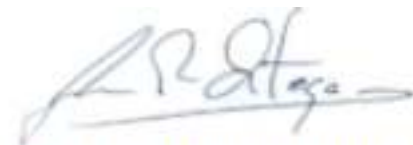

Grupo Energía Bogotá (GE8) and Transportadora de Gas Internacional (TGI), together with other institutions, have been actively supporting the preparation of a Concept Note, before the Green Climate Fund, on a Financing Proposal for the Project "Peace, Social Protection and Adaptation to Climate Change" (PPS+Climate), to be presented by the Food and Agriculture Organization of the United Nations (FAO), as an accredited implementing agency.

This Project has the objective of supporting the most vulnerable rural households in the Dry Corridor of Baja Guajira and the Department of Cesar to adapt their livelihoods to the effects of climate change and improve their resilience, through sustainable agriculture and livestock options, and climate-smart, associativity and better access to markets and services, as well as through agro-climatic risk management. The proposal also provides for activities to restore degraded landscapes and the conservation of vital environmental services based on conservation agreements; especially, water regulation, biodiversity conservation and ecosystem connectivity.

The PPS+Climate Project is aligned with the sustainability strategy, the policies and the strategic map of GEB and TGI, which is why we want to make a clear record of our participation, as well as express our will and support for the Project.

Once the Project is prioritized, we will proceed to the preparation of the Full Funding Proposal (GCF), we will agree with FAO and other participating institutions on our specific role, the implementation arrangements and the counterpart co-financing from each of the organizations participating in the Project.

Sincerely,

JUAN RICARDO ORTEGA
Presidente
Grupo Energía Bogotá

MÓNICA CONTRERAS
Presidenta
Transportadora de Gas Internacional
